EDUCATION

Bachelor of Computer Engineering, BIHE University

2018, 2023

618th person of Entrance University Exam in math

Experience

Frontend Developer (React js-Next js-Typescript) - More than 3 years

Frontend Intern (React js) - 2 month

Flutter Intern - 3 month

PROJECTS

Internfinder - English Version

In the Internfinder project, we utilized React with TypeScript and Django to create a platform tailored for both job seekers and companies. This project helps individuals find internship opportunities and allows companies to search for interns based on specific salary requirements.

Shop store - English Version

In the shop store, I developed a simple site that displays products, provides detailed product information, includes a shopping cart, and offers search functionality. I used Next.js, TypeScript, Zustand, and Material-UI (MUI) for the implementation.

Snapp - English Version

In the Snapp project, we used HTML, CSS, and JavaScript for the front-end development, while the back-end was built using Java.

Sakhreh - Persian Version

Sakhreh is similar to the Divar website in Iran, designed for buying and selling items. The front end of the project was developed using HTML, CSS, Bootstrap, and JavaScript, while the back end was built with PHP.
